

Costa Rican Design Theft

Could there be a more unashamed example of artwork from one country being used unofficially by another country? Royal Mail is unlikely to ever have approved such a usage, even – or especially – in its pre-corporation days. Other examples probably exist for other countries, but this has always been a favourite! The only difference is the addition of a black squiggle on the right-hand engine casing on the stamp.

(Excuse poor image quality.)
